About Me

Results-driven AI and data science professional with expertise in machine learning, data analytics, and software development. Skilled in Python, SQL, cloud technologies, and building intelligent applications. Experienced in designing scalable, data-driven systems for automation and actionable business insights.

Skills

- **Programming:** Python, SQL, Java, C, JavaScript
 - **Data & AI Tools:** NumPy, Pandas, Matplotlib, Seaborn, LangChain, MISP
 - **Cloud & DevOps:** Google Cloud, Azure, Docker, DigitalOcean
 - **Visualization:** Power BI, Streamlit
-

Education

Post Graduate Certificate in Applied A.I. Solutions Development

George Brown College, Toronto, ON | Sep 2025 – Current

Post Graduate Certificate in Cybersecurity and Threat Management

Seneca College, Toronto, ON | CGPA: 3.9 / 4.0 | Sep 2024 – Apr 2025

Bachelor of Science in Computer Science

Mumbai University, Mumbai, India | CGPA: 8.06 / 10 | Jun 2020 – Mar 2023

Projects

Cyber Threat Intelligence Automation & Analytics

Sep 2025

- Deployed Docker-based MISP integration automating live threat feeds (APT28, APT29, CIRCL, OpenCTI), improving analyst response speed by 25%.
- Built ELK dashboards for real-time visualization of threat categories, IOC timelines, and adversary behaviors.
- Developed an AI-driven cybersecurity chatbot with Google Gemini API, VirusTotal API, and Gradio, reducing analyst workload by 30%.
- Optimized IOC processing pipeline, reducing ingestion time to ~2 minutes/dataset.

Tools: Docker, MISP, ELK, Google Gemini API, VirusTotal API, Gradio, Python

AI Resume & Job Description Matcher

Jun 2025

- Built an NLP matching engine comparing resumes to job descriptions with 85%+ accuracy.
- Developed keyword recommendation system, boosting ATS scores by 20–30%.
- Deployed full-stack Streamlit Cloud app with CI/CD pipelines using GitHub Actions.

Tools: Python, Streamlit, Sentence-Transformers, GitHub Actions

Driver Drowsiness AI – Real-Time Monitoring System

Jul 2025

- Developed system using OpenCV, MediaPipe, Python, and Streamlit for real-time drowsiness detection via EAR/MAR.
- Implemented alerts, logging, and dashboards for driver safety monitoring.

[App Link](#)

AI Text Summarizer (News/Legal)

Mar 2025

- Built Streamlit app summarizing long-form text using BART & T5 NLP models, reducing review time by 40%.
- Adjustable summary-length sliders and 98% uptime on Streamlit Cloud.

Tools: Python, Streamlit, Hugging Face Transformers

Work Experience

Customer Service Manager, Walmart

Toronto, ON, Canada / Oct 2024 – Current

- Led a team of 15+ employees, ensuring compliance with company standards and efficient operations.
- Improved customer satisfaction by 20% and reduced resolution time by 15%.

Senior Software Developer, Reliance Jio Platforms

Mumbai, India / Aug 2023 – Sep 2024

- Built web apps for 50,000+ daily users; automated data workflows reducing manual effort by 30%.
- Implemented REST APIs for analytics, increasing data accessibility by 40%.

Data Analyst, Freelancer

Mumbai, India / May 2023 – Jun 2024

- Analyzed operational datasets to support reporting.
- Built automated workflows and dashboards for internal stakeholders.

Web Developer Intern, Intermind Digital Solutions

Mumbai, India / Sep 2022 – Dec 2022

- Developed dynamic websites, improving traffic by 15% and SEO ranking by 10%.
- Managed MySQL databases and Git workflows.

Certifications

- Power BI – Udemy (Aug 2025)
- CCNA IP Addressing and Subnetting – GNS3 Academy (Oct 2024)
- Python 101 for Data Science, Tableau – IBM Skills Network (Mar 2023)
